SERENA'S SHOOTING STATS

#SIRENSTRIBE

Remember: When taking shooting stats make sure you don't count the penalties. If the shooter attempts and misses, but a penalty is called, only count the penalty shot.

An easy way to keep track would be to circle the number if a shot was attempted, and put a line through it if it was successful.

At the end of each quarter, you can figure out the percentage for each shooter by dividing the successful goals by the number of attempts and multiplying that by 100.

GS:	⊘ ⊘ 3 4 ⊘ 6 ⊘ ⊘ 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30
GA:	⊘ ⊘ 3 4 ⊘ 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

The above score stat sheet shows that the GS in the first quarter had 8 attempts to score. They were successful for 6 of those attempts but missed their 3rd attempt and 8th attempt.

Their shooting percentage would then be: 6 / 8 = 0.75 (x100) =75%

The GA in the first quarter had 6 attempts to score. They were successful for 5 of those attempts but missed their 1st attempt.

Their shooting percentage would then be: 5 / 6 = 0.83 (x100) = 83%

It is great to get the above template ready for all 4 quarters, for any GS or GA that may come on each quarter.
